

Regular/Supplementary Winter Examination – 2024

Branch : Computer Engineering/Computer Science and Engineering

Subject Code & Name: BTCOC702 Cloud Computing

Duration: 3 Hr.

Each question carries 12 marks.

Question No. 1 will be compulsory and include objective-type questions.

Candidates are required to attempt any four questions from Question No. 2 to Question No. 6.

4. The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.

5. Use of non-programmable scientific calculators is allowed.

6. Assume suitable data wherever necessary and mention it clearly.

51644632

	c. Per-unit Pricing	d. Subscription-based pricing		
11	Cloud Bursting for load balancing between clouds is an example of a. Community cloud b. Public cloud c. Private cloud d. Hybrid cloud			1
12	SaaS is useful in case of applications where extremely fast processing of real time data is needed. a. True b. False			1
Q.2	Solve the following.			12
A)	How web applications can be designed using cloud environment? Explain with an example.	Analyze Evaluate		6
B)	What are the main cloud service models you can choose from when using a cloud service provider? Explain any two.	Remember understand		6
Q.3	Solve the following.			12
A)	Why are data centers important? What are the standards in data center design? State the types of data center services.	Remember		6
B)	By using cloud computing, how vast amount of computing power is achieved from relatively low-cost PCs and servers? Explain with the help of architecture.	Evaluate Apply		6
Q. 4	Solve Any Two of the following.			12
A)	What is Software-Defined Networking? Explain with its architecture. State its advantages.	Remember Understand		6
B)	Explain the concept of hypervisor in details with their types and example systems. List the benefits of virtualization.	Remember Analyse		6
C)	What is software defined storage? What are some examples of it? How does it work as compared to regular storage?	Remember Understand		6
Q.5	Solve Any Two of the following.			12
A)	Explain the concept of a cloud storage service level agreement (SLA). State the primary types of cloud storage. How do cloud storage providers ensure data durability?	Understand Analyze		6
B)	What are the main types of cloud databases? What does a consumer gain when opting to utilize a virtual machine and set up a database on it?	Remember		6
C)	Describe the concept of MongoDB. What are the benefits of using MongoDB? Also list the advantages of MongoDB.	Understand		6
Q. 6	Solve Any Two of the following.			12
A)	Explain the concept of Cloud object storage with its architecture and examples. How to avoid losing the Metadata from the data?	Remember Analyze		6
B)	What do you know about AWS S3? Explain the architecture of Amazon S3.	Remember Understand		6
C)	What is OpenStack? What are the three main components of OpenStack? State the benefits of using the OpenStack?	Remember Understand		6
